

Sponsorship Information

The 2023 District 10 Science Day will be held in-person on Saturday, March 25th at the Miami Valley Career Technology Center in Montgomery County. The District 10 Science Day will continue to serve students in grades 5-12 who represent public, private and homeschools in Montgomery, Greene & Clark Counties. Projects are judged based on how well the student understands and follows the scientific method and/or the principles of engineering design, demonstrates knowledge of the subject matter, originality of the project, and on the written, oral, and visual presentation of the project.

Student researchers put months of effort into their projects and their presentations, and we believe recognition of their work is both warranted and beneficial to maintain their interest in STEM education, research, and careers. Providing top students with awards helps to demonstrate how the STEM community appreciates their hard work.

We hope you will be a part of that support in 2023. Please consider any size donation to fund this year's District 10 Science Day.

Organization and planning for a District Science Day begins months in advance. There are a number of expenses involved in preparation as well as the day of the event. We provide printed and digital instructional and support materials to teachers and students, certificates for student projects, badges for students and judges, refreshment for all participants, and there are other event supplies required. Donations from sponsors provide funding for most of the expenses and for almost all of the awards.

You may find additional information regarding District 10 Science Day here:
